How does a web site from First Due enhance your department or squad?

First Due Web Services is able to provide your department, squad or business with a web site that suites your needs at affordable prices. We cater to the public safety sector of the web, giving you the tools to make your site the number one public information tool your department or squad could use.

Some of the features you will have at your fingertips include, but are not limited to:

- News, Pages and Events management
- Links management
- Photo Gallery
- Media management
- File Vault
- Public and Private downloads
- Customized email addresses for your members
- Web site statistics
- Member's area with forums

If there is a feature we don't offer, just contact us! We will make every effort to make your web site management as easy as possible.

News, Events and Pages

By using our management tool, you are able to add news stories to the front page of your site with a few clicks of your mouse. You are also able to add additional content pages and events just as easy.

Photo Gallery

Upload your photos to your site with no restrictions! Your visitors are able to view your photos with ease. You can also associate a news article with one of your photo albums to enhance the story.

Links Management

Utilizing the link management utility, you are able to add, organize and maintain the content of your links page. Create categories such as Mutual Aid Departments, Fire Services, and Our Town.

Member's Area

This is one of the most exciting features of our services. The member's area allows you to post news stories, content pages and more, in a password-protected site that only your authorized members can access. You can also build a community with the forums.

Public and Private Downloads with File Vault

By using the File Vault, you are able to upload PDF, Word documents and more to your site. You can post them to the public site or to your Member's Area. You can distribute last month's meeting minutes or even your SOP/SOGs.

Email

We are proud to offer your department or squad a quality email solution utilizing Google Apps for your Domain. Sure we could offer you cheesy web mail, but why waste your time? Google Apps for your Domain allows you to host email, calendars and more. Default is 50 email accounts but any Not-For-Profit can have that limit lifted. We will help you get situated with email accounts. Supply us with a spreadsheet of your members and we will make all your accounts for you!

We have just touched on some of the features we are able to offer your department or squad. We at First Due are here to serve you and your needs. Just contact us and we would be more than happy to assist you with your web site.
